

## HOW UP SO DOWN

**Author:** Denes Joo, Architect-Urbanist, Systemic Evolutions & Pyramids Independent Researcher.

**Abstract:** In continuation of the **Terrestrial Projections of the Cosmic Environmental Connections** [1], it's detailed the European Continental Territory, inside it focusing on the Central European Area. The unsuccessful functioning of the Hybrid European Union is shoring up the pressing necessity for a normal environmental-territorial, human-social and economical efficient reorganizing of Europe, with a synergic functioning based on **cosmic principles**, namely corresponding to the cosmic structure and functioning organized around the Constellation Draco (Carpathian Mountains) [2], with the Nebula NGC 6543 called „Cat's Eye" inside, as Ecliptic Pole (the Rosia Poieni Peak in the West-Carpathians, Romania).

**Context:** At the beginning, the mythological robbing of Europe by Zeus indicates the former central position and role of the Olympus Mountain in the actual Balcanic territory. Really the actual mountain and its surroundings are the remains of a large mountain-pyramid, before the forming of the Carpathian-Chain as the second projection of the Constellation Draco on the Earth, with its centre as Ecliptic Pole, in form of the large mountain-pyramid ROSIA POIENI inside the Western-Carpathians, Romania (2A) (2B) [3]. So, in the course of the cosmic evolution of the Photon-Belt (1A), the centre of Europe was replaced, but without taking into consideration this fact in the territorial organizing of Europe inside the Eurasian and Terrestrial context, especially after the coming into existence of the Hybrid European Union.

**Concept:** Based on the **Hermetic Principle „How up so down"**, the cosmic structure and events are reflected on the Earth, evolving inside the Solar System along his solenoid-like cyclic movement on the Photon-Belt (1A). This reflection is visible especially on the Earth's surface, along the crust-forming process of the initial heat drop, which is transforming from the toroidal to the spherical form [4]. In the spherical state are 4 positional phases distinguishable relatively to the Sun: 1) Moon-like one-sided; 2) rocking; 3) first-equatorial; 4) second –equatorial (4A) (4B). The projection of the central element of the Photon-Belt-System – the **Constellation Draco**, with the **Ecliptic Pole** inside – took place in the 3) and 4) positional phases, around 500-480 million, respectively 250-200 (plicated phase, exterior range) and 15-9 million years ago (volcanic phase, interior range), in form of the **Asian (1C)**, respectively **European Carpathians (2B) (3)**, the last being the bottom of the **Eurasian Bird (1C) [5]**, and inside them the Ecliptic North Pole being the **Rosia Poieni Peak (2B) (3) [3]**. In this vision it's opportune to take into consideration the „How up so down" principle in the territorial organizing of the **Central European Area**, especially around the Carpathian-Chain, and of the whole Old Europe.

**Description:** During the terrestrial evolution, the **global civilizations** were taking shape only in the last million years, with guiding centres on the continent-dimensional oceanic isles (2): 1) Hyperborean – Arctic Ocean – Thule; 2) Agartha – Indian ocean – Ma; 3) Maya –

Pacific Ocean – Mu; 4) Atlantic – Atlantic Ocean – Atl; except 5) Arya – Asian Continent – Tibet [6]. The continental civilizations – being conditioned by the presence of the **water** – were formed naturally according to the river-basins [7], but in many cases they were and are „organized” after other principles, e.g. the 13 European „kingdoms” after the Napoleonean wars, just like the first 13 „states” in the United States of America. This 12+1 organizing reminds us of the ancestral Hesiodian dodeca-divine structure, between them the 12 Olympean Gods too. The ancestral people employed the 6 or 6+1 model too, the first in form of 2x3 components [6]. The starting-point of all these organizing-models’ is the terrestrial projection/reflection of the **Constellation Draco/Dragon**, the celestial representation of the **draconic** cosmic race [8], surrounded by 12 **reptilian** and many **mammal** constellations, in order of their evolution. The first/**Asian** projection represents the **crop**, respectively the second/**European** projection – the Carpathian Mountains, elongated in both directions – the **bottom** of the Eurasian Bird (**1C**). The **European Carpathians** (**3**) are evolved **near** the E-W Eurasian Mountain-chain, the **spinal column** of the Eurasian Bird, but both interrupted by the Crete Sea – Kyklades – Egean Sea – Dardanelles-strait – Marmara Sea – Bosphorus/Bas-boreus (=Boreus-invicted)-strait, and transforming it in the Balcanic Mountains – fastening the projection of the Constellation Ursa Minor – with a new continuation from Sofia as Rodope Mountains on the Balcanic territory, and so making disappear the **bottom** of the Dragon near the South-coast of the Black Sea and through it to Sevastopol, the **tail-end** of the Dragon. So, the transformed

projection of the Constellation Draco – the initial European Carpathians – was shortened by this end. The other end begins with the **head** of the Dragon (Moravian Basin) and is continuing with the **chest and forelegs** (Slovakian Mountains), **waist/back** (East Carpathians), **thighs** (South Carpathians) and **hindlegs** (Balcanic Carpathians). In other words, the **tail** of the Dragon was cut, the European Carpathian-chain was clearly separated from the Asian part (**3**). In this context, the Olympus Mountain was (and it is!) the projection of the load-star Thuban. After the name of the constellation, let call we this Central-European territory **DRAKYA** (**3**), separated by the **Danube River** in North-Drakya = **DAKYA**, and South-Drakya = **TRAKYA**, bordered by the North-, respectively South-European Seas, and Dnester-Bug line to East, respectively Trieste-Szczecin line to West, with directing centre in the proposed new town, called **Whole Periodic City „ROSIA POIENI”** [3], the projection of the **Ecliptic Centre**. This Central-European Territory – with the former German-Roman Empire territory together – is forming the **Central European Area**, which is surrounded by the East-, North- and West-European Areas, together forming the European Continent. This continental organizing is suited to the ancestral 2x3 global self-organizing model [6], but instead of 2x3x4 with 2x3x5 continental areas, with areal self-government based on elections in every fifth year, and with government role after every 30 years. In this European Continental Territory don’t takes part the Russian territory, it’s considered separate, in context of the Eurasian Bird. Similarly to the new Whole Periodic City **ROSIA**

**POIENI** in the Carpathians for **DRAKYA**, it will be necessary to realize new guiding centres for every continental area, reconsidering the whole settlement network and highway-system, taking into consideration the energetic grid of the **Earth (4A) (4B) [6] [9]**, and the new possibilities of the dimensional energy and cronovisor systems, in correlation with the balanced evolution of **Our Planet**, putting back the **Cosmic Harmony**.

**Conclusions:** Based on the global cosmic interactions, expressed in the form of the ancient Hermetic Principle „How up so down”, into a systemic view [10] [11] it's possible to conclude former or future events, respectively the most efficient evolutionary lines on every existential level. So, after the ethnic, religious, social, economic, territorial and many other fragmentations – in other words atomizations – it's time to restructure the whole terrestrial civilization, and inside it the European Civilization, which many centuries ago is looking only for itself. Instead of the actual unicriterial (e.g. nationality) systems it's necessary a synergy of multicriterial systems. The above sketched idea offers the possibility to elaborate a fertile organizational model for the terrestrial – inside which the whole European – restructuring.
